Good afternoon,

The VWCA Board has gathered the following information to assist you during any type of hazard, i.e. hurricane, tornado, etc.

If you are away from your Venice home during an emergency weather event, please make sure that your home is secure and check in with your local person who takes care of your unit during your absence. Please make sure your hurricane shutters are in place and that there are no items left outside that could become a missile in heavy winds, hurt someone or damage property, i.e. outdoor furniture, garbage cans, bird baths, large planters, decorations, etc. Move all items from your lanai to inside.

If you are at your Venice home during the emergency weather event, we suggest that you prepare your home and yard as stated above. If you have guests occupying your home/unit at this time, please pass this information on to them.

Attached are the following pdf documents which contain a lot of helpful advice regarding home preparedness, evacuation zones (we are Zone "C"), shelter locations, transportation to shelter locations, etc. which we obtained from the Sarasota County Emergency Management Office today for your reference:

- § All Hazards Disaster Planning for Sarasota County 2020
- § Sarasota County 2020 Evacuation Map

This information will also be posted on our web site:
